

Freedom from glasses

Whether it is about securing a good job in an industry with stringent vision standards or just a marriage proposal, spectacles can become an obstacle. Earning freedom from glasses can be very liberating. Ophthalmologist Dr Chandrashekhar Wavikar says, "Freedom from glasses is possible irrespective of age. With new, less painful and proven techniques in ophthalmology, it is a safe procedure. Tailor-made solutions can be devised and applied easily."

Dr Wavikar is an eminent eye surgeon with specialised skills and techniques in vision correction. With over 17 years of experience in various cataract surgery procedures, he heads the Wavikar Eye Institute in Thane as its Medical Director. His specialties include phacoemulsification cataract surgeries with multifocal IOL implant, Toric IOL implant, other astigmatism procedures and micro co-axial phacoemulsification through less than 2 mm of incision. He is an expert in Bladeless Cataract Surgery and also performs routine refractive surgeries such as LASIK, PRK, EPI LASIK, PHAKIC IOL and has a special interest in Custom LASIK (F-cat-Q value adjusted LASIK). Involved in social activities such as awareness about eye donation, he also organises welfare activities for senior citizens.
